

GCC Electrical  
Testing Laboratory

المفتبر الفليبي لفمص الممدات الكهريانية

## Asset Performance Analysis (Introductory Training)

Incidents and the performance of the network are keeping us awake at night. The performance of the network is directly linked with the performance of the organization. It is therefore highly important that the resources of our organizations have a clear understanding of how to manage the performance of the assets and avoid further disturbances of these assets.

2018

# GCC Electrical Testing Laboratory

المختبر الفلبي لفحص المعدات الكهربائية

## Asset Performance Analysis (Introductory Training)

### PROGRAM

The Course program contains the following training outline:

<b>DAY 1</b>	General Introduction to Asset Management and Asset Performance Principles
<b>DAY 2</b>	Introduction and deep-dive in the Asset Performance activities through the governance processes and the required data
<b>DAY 3</b>	The added value of Asset Performance Analysis – use cases
<b>DAY 4</b>	Workshop – incident analysis, Performance Indicators, trends and defining recommendations.
<b>DAY 5</b>	Introduction to the tools used to support Asset Performance Analysis and future trends in the APA domain (leading indicators)

### Objectives

The course is aimed at providing knowledge on the activities of an Asset Performance Analysis entity, showing the added-value through uses cases and preparing the experts on interpreting performance trends and developing recommendations. The objective is also to allow the attendees to have a glimpse of the future of Asset Performance Analysis, through Leading Indicators.

#### Addressed to:

Stakeholders of Asset Performance Analysis (whether from dedicated divisions or resources confronted with incidents and grid disturbances).

#### Duration:

5 Full Days

#### Location/Venue:

GCCIA HQ, Dammam

#### Course Fees:

### Asset Management Risks
