

**GCC Electrical  
Testing Laboratory**  
المفتبر الفليبي لفمص الممدمات الكهريانية

## **CERTIFIED ASSET MANAGER PROGRAM - (IAM) CERTIFICATE**

This 5-day course is delivered as a public workshop and at customer sites. It discusses the core concepts and the practical applications in a highly interactive manner. This course is suitable for those with some experience of asset management (they may have some specific maintenance experience, but little knowledge of the wider context, such as business strategy, risk management, life cycle costing etc).

**CERTIFIED ASSET MANAGER  
PROGRAM - (IAM) CERTIFICATE**

# GCC Electrical Testing Laboratory

المفتبر الفليبي لفحص المعدات الكهربائية

## Qualification

IAM Certificate in Asset Management.

## Course Overview

Public and private organizations invest vast sums of money in assets. These might be infrastructure, utilities, buildings and machinery in sectors such as oil, gas, chemical, utilities, engineering, transport and manufacturing. If you sweat your assets too much they may fail and incur expensive repair and loss of product/service costs. If your asset is under-utilized then capital is tied up unnecessarily. Asset management is not just about maintenance and keeping downtime to a minimum. It is about optimizing the performance and minimizing the cost of ownership throughout the life cycle of the asset.

## The course will focus on:

- What is Asset Management?
- Introduction to ISO55000
- Benefits of Asset Management
- Risk & Risk Management
- Organizational Context & Stakeholder Expectations
- Scope of the Asset Management System
- Asset Management Policy, Strategy & Objectives
- Asset Management Planning & Asset Information
- Asset Management Decision Making, Leadership & People
- Asset & Asset Management System Performance
- Life Cycle Activities & Finance and Business impact

## The course will:

- Help delegates understand the fundamental principles underpinning Asset Management
- Illustrate Asset Management Policy & Strategy and show how it is developed
- Help delegates understand Asset Life Cycle Management
- Show the factors influencing an asset's total life-cycle costs
- Help delegates understand the information requirements related to the life cycle of an asset
- Demonstrate the relationship between asset management and risk management
- Illustrate the way Asset Management is assessed (BS ISO 55001 requirements)

## Who should attend:

- Maintenance Department Managers
- Maintenance Division Managers
- Maintenance Professionals responsible for building and sustaining a world-class maintenance program.
